

## Opening Innovation with Future Leaders

Open Source with SLU, the open source program office for Saint Louis University, facilitates open science and engages students in professional open source development. Students work as professionals on projects that matter:

- Client-driven development
- Open source contributions
- Professional standards
- Authentic experience
- Structured support
- Career preparedness

Get custom software solutions while providing invaluable opportunities for emerging developers.

## Client-Driven Development Process

- Clients bring challenges—simulation platforms, data analysis, IoT, mobile apps, workflow management, and AI/ML—across research, medicine, energy, aviation, aerospace, and manufacturing sectors.
- We determine the requirements, scope, timelines, architecture, and planning through dynamic client communication.
- Solutions are developed in semester-long iterations with weekly meetings, client collaboration, and continuous delivery.
- Each cycle culminates in handoffs to clients and future teams, then repeats with new requirements and enhanced planning.

## Mentors & Structured Support

Students receive comprehensive mentoring through multiple support layers that build industry-ready skills.

### Support Team

- Industry Fellows mentor Tech Leads and teams
- Tech Leads as continuous near-peer mentors
- Faculty structure and support entire teams
- Staff coordinate client & project timelines
- Sponsored developers accelerate delivery

### Structured Programs

- BOLT workshops train Tech Leads each semester
- Individual and group mentoring throughout
- Formal processes ensure meaningful work
- Rigorous code review & QA protocols
- Scheduled and on-demand support

## Success Metrics

- Client satisfaction
- Workforce development
  - Technical skills
  - Problem solving
  - Communication
- Community impact

Partner with and sponsor innovation! →

## Partnership Impact & Value

Year-long capstone projects and two annual showcases demonstrate student impact across multiple industry sectors.

### Proven Results

- 21 active products, 11 completed projects since 2022
- \$500K+ in estimated development value delivered
- 80+ new professionals gain skills & experience annually
- 500+ attendees at annual showcase events

### Strategic Benefits

- Development teams at academic-rates
- Direct talent pipeline access
- Open source ecosystem contributions
- Research collaboration opportunities

### Why Partner with Open Source with SLU

**Proven Expertise:** 3+ years delivering solutions across diverse industry sectors, including research, healthcare, energy, aviation, aerospace and manufacturing sectors.

**Scalable Engagement:** From community partnerships to embedded R&D satellites.

**Innovation Pipeline:** Academic research meets industry applications with professional oversight.

**Talent Development:** Develop future workforce while solving current challenges at university rates.

## Sponsorship Opportunities

### Events Sponsorship Opportunities

- BOLT Workshops
- Fall Pitch Presentations
- Spring Research Showcase
- Innovation Challenges
- Annual Partner Summit

### Program Sponsorship Opportunities

Program sponsorship creates strategic partnerships delivering graduate student development capacity, employee mentorship through Industry Fellows, and sustained talent pipeline access.

### Sponsorship Tiers

- Strategic Partnership
- Premium Partnership
- Standard Partnership
- Development Partnership
- Community Partnership

### Get Involved
